PROJECT TITLE

My Personal Portfolio Website

AGENDA

- Problem Statement
- Project Overview
- End Users
- Tools and Technologies
- Portfolio Design and Layout
- Features and Functionality
- Results and Screenshots
- Conclusion
- GitHub Link

PROBLEM STATEMENT

- A paper resume lists skills but doesn't truly show them. In web development, demonstrating your work is key. I built this website as a live portfolio to showcase my projects and skills in action.

PROJECT OVERVIEW

- I built a single-page website that acts as my online resume. It introduces me as a Computer Science student who loves making websites. Everything is on one long page, so you can just scroll down to see all my info, like my education, skills, and projects.

END USERS

- I made this website for a few groups of people:

- • Companies: So people who hire can easily see my work.

- • Other Tech People: To share my projects with other developers and maybe work together.

- • Teachers: To show them how I use what I learn in class on real projects.

TOOLS AND TECHNOLOGIES

- Tools I Used:

- • HTML: To build the website's pages.

- • CSS: To style it, add colors, and make it look good.

- • JavaScript: To make the site do cool things, like animations.

- Other Things I Used:

- • Boxicons: For all the little icons on the site.

- • GitHub: To save and manage my code.

PORTFOLIO DESIGN AND LAYOUT

- I wanted to make the website clean and easy to use.

- • How it's set up: It's one long page with a menu at the top that stays there as you scroll.

- • How it looks: I used calm colors and put information into 'cards' to keep it organized.

- • Works on any device: The website looks great on phones, tablets, and computers.

- • Fun effects: When you scroll, sections fade in smoothly to make it more interesting.

FEATURES AND FUNCTIONALITY

- Here are some of the things you can do on the site:

- • Easy Menu: The menu at the top is always there, so you can quickly jump to any section.

- • Scroll Effects: As you scroll, new parts of the page appear with a nice animation.

- • Certificate Viewer: You can click on my certificates to see them up close in a popup.

- • Contact Form: There's a simple form to easily send me a message.

- • Get My Resume: You can download my full resume with just one click.

CONCLUSION

- I'm very happy with how this project turned out. I made a clean, working website that shows off my skills much better than a paper resume ever could. It's a great tool that will help me in my career and shows my passion for creating things on the web.
